EXPERIENCE IN ONE DAY ...**

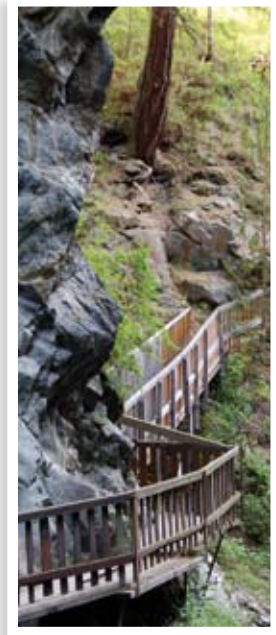

GORNER GORGE

DELVE INTO AN OTHER WORLD

Delve into the world of rugged rock formations, colours and forms!

You can experience what was created in thousands of years in a single day. For thousands of years the tumbling waters of the Gornervispa have gradually eroded a passage by rushing and gurgling their way ever deeper into the rock. Today, the Gorner Gorge is a popular tourist destination.

Water - a magical element in dense and fluid form. The Gorner Gorge boasts a unique world of different rock formations.

This impressive spectacle of nature welcomes young and old guests alike.

The trip is certain to be fun for families. The walk along the rocks offers a great deal of variety and a marvellous view across gorge.
